REQUEST TO WITHDRAW HOLDING OF ABANDONMENT

REMARKS

Applicants are submitting herewith a Petition to Withdraw Holding of Abandonment pursuant to 37 C.F.R. § 1.181. In the present case, a Notice of Allowance issued with DATE MAILED: 09/20/2006 as indicated on the attached copy of the Notice of Allowance as Exhibit A. However, the Notice of Allowance was returned to the U.S. Patent Office by the U.S. Postal Office as undelivered and received by the Patent Office on October 27, 2006. The receipt of the undelivered Notice of Allowance is evidenced by the USPTO PAIR Database for this case. A copy of the PAIR database printout along with a copy of the undelivered Notice of Allowance as received by the U.S. Patent Office is attached herewith as Exhibit B.

Applicants' respectfully submit herewith that their first notification of the issuance of the Notice of Allowance was on January 3, 2007. In this regard, Applicants through their undersigned attorney of record retrieved a copy of the issued Notice of Allowance from the USPTO PAIR Database based on a status check conducted pursuant to internal docketing procedures of Applicants' undersigned attorney of record. The retrieved Notice of Allowance is attached as Exhibit A. Applicants are submitting herewith as Exhibit C a copy of the docket record associated with this case evidencing same.

Accordingly, Applicants respectfully submit that the Notice of Allowance was not received by Applicants and Applicants attorney of record prior to the date that the issue fee was due (i.e., December 20, 2006). As previously discussed, Applicants through their attorney of record were first notified of the Notice of Allowance after the issue fee was due (e.g., January 3, 2007) based on the retrieval of the Notice of Allowance from USPTO's PAIR Database subsequent to a status review of this case according to internal docketing procedures conducted in the regular course of business. Therefore, Applicants respectfully request that this petition be granted, and thus, the holding of abandonment be withdrawn. In view of same, Applicants respectfully request that the Patent Office issue the Notice of Allowance again, thus providing Applicants with three months from the date of issuance for payment of the issue fee.

If the Patent Office should have any questions regarding Applicants' Petition, Applicants respectfully request that the Patent Office contact the undersigned attorney of record, and, if convenient, by telephone to resolve any potential issues that may remain.

Respectfully submitted,

BELL, BOYD & LLOYD LLP

DETAILED ACTION

1. The Response filed on July 6, 2006, has been entered and acknowledged by the Examiner.

Election/Restrictions

2. This application is in condition for allowance except for the presence of claim 3 directed to a discharge beam estimating method, for an optical fusion splicer non-elected without traverse. Accordingly, claim 3 has been cancelled.

EXAMINER'S AMENDMENT

3. The application has been amended as follows:

Claim 4 (Currently Amended). A method for fusion splicing of an optical fiber using an optical fiber fusion splicer comprising a setting means for setting respective end surfaces of two optical fibers that are to be spliced in order to abut against each other, a heating means for generating an arc discharge between two discharge electrodes and heating an abutment portion of said optical fibers using a discharge beam, and an image pickup means for picking up an image of said discharge beam, the method comprising: measuring, from image signals obtained by said image pickup means when a preliminary arc discharge is generated between said discharge electrodes when no optical fibers have been placed in a discharge area, brightness distributions on a plurality of lines that are set at different positions along a rectilinear direction between said discharge electrodes and run in a direction substantially at right angles to the rectilinear direction; estimating a

heating center of the arc discharge along an axial direction of the optical fiber from the plurality of brightness distributions; controlling a position of said setting means along the axial direction of the ~~optional~~ optical fiber such that the abutment portion of said two optical fibers is positioned in the estimated heating center; and thereafter controlling said heating means such that a main arc discharge is generated and said abutment portion is heated by said discharge beam.

Allowable Subject Matter

4. Claims 4 and 5 are allowed.
5. The following is an examiner's statement of reasons for allowance:

Regarding to independent claim 4, prior art of record taken alone or in combination fails to teach or suggest a method for fusion splicing of an optical fiber using an optical fiber fusion splicer comprising: estimating a heat center of the arc discharge along an axial direction of the optical fiber from the plurality of brightness distributions; controlling a position of the setting means along the axial direction of the optical fiber such that the abutment portion of the two optical fibers is positioned in the estimated heating center, in combination with other claimed method of the present claimed invention.

Regarding to claim 5, is allowable because of the dependency upon the allowable independent claim 4.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dalei Dong whose telephone number is (571)272-2370. The examiner can normally be reached on 8 A.M. to 5 P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nimeshkumar Patel can be reached on (571)272-2457. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

DETAILED ACTION

1. The Response filed on July 6, 2006, has been entered and acknowledged by the Examiner.

Election/Restrictions

2. This application is in condition for allowance except for the presence of claim 3 directed to a discharge beam estimating method, for an optical fusion splicer non-elected without traverse. Accordingly, claim 3 has been cancelled.

EXAMINER'S AMENDMENT

3. The application has been amended as follows:

Claim 4 (Currently Amended). A method for fusion splicing of an optical fiber using an optical fiber fusion splicer comprising a setting means for setting respective end surfaces of two optical fibers that are to be spliced in order to abut against each other, a heating means for generating an arc discharge between two discharge electrodes and heating an abutment portion of said optical fibers using a discharge beam, and an image pickup means for picking up an image of said discharge beam, the method comprising: measuring, from image signals obtained by said image pickup means when a preliminary arc discharge is generated between said discharge electrodes when no optical fibers have been placed in a discharge area, brightness distributions on a plurality of lines that are set at different positions along a rectilinear direction between said discharge electrodes and run in a direction substantially at right angles to the rectilinear direction; estimating a

Art Unit: 2879

heating center of the arc discharge along an axial direction of the optical fiber from the plurality of brightness distributions; controlling a position of said setting means along the axial direction of the ~~optional~~ optical fiber such that the abutment portion of said two optical fibers is positioned in the estimated heating center; and thereafter controlling said heating means such that a main arc discharge is generated and said abutment portion is heated by said discharge beam.

Allowable Subject Matter

4. Claims 4 and 5 are allowed.
5. The following is an examiner's statement of reasons for allowance:

Regarding to independent claim 4, prior art of record taken alone or in combination fails to teach or suggest a method for fusion splicing of an optical fiber using an optical fiber fusion splicer comprising: estimating a heat center of the arc discharge along an axial direction of the optical fiber from the plurality of brightness distributions; controlling a position of the setting means along the axial direction of the optical fiber such that the abutment portion of the two optical fibers is positioned in the estimated heating center, in combination with other claimed method of the present claimed invention.

Regarding to claim 5, is allowable because of the dependency upon the allowable independent claim 4.

Art Unit: 2879

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
